2015 Quarterly Report
SEPTEMBER 30, 2015

Dear CoBank Customer-Owner:

We're pleased to report that CoBank recorded another period of strong financial performance in the third quarter of 2015. Average loan volume increased across all three of our operating segments, and credit quality and profitability remained strong. More importantly, we continued to fulfill our mission by providing dependable credit and financial services to our customers across rural America.

Average loan volume rose 11 percent during the quarter to $83.2 billion, from $75.0 billion in the third quarter of 2014. For the first nine months of 2015, average loan volume rose 7 percent to $81.6 billion, compared to the same period last year. The increases resulted from higher levels of borrowing from customers in a number of industries, including affiliated Farm Credit associations, rural electric cooperatives and power supply companies, rural communications service providers and food and agribusiness companies.

Net income for the third quarter increased 5 percent to $235.8 million, compared to $224.7 million in the third quarter of 2014. For the first nine months of 2015, net income increased 2 percent to $700.4 million, compared to $688.9 million in the same period last year. Key drivers of increased profitability for both the quarter and year-to-date periods included higher net interest income as well as an increase in prepayment income net of losses on early extinguishments of debt. Net income for the nine month period also reflected a $10.0 million provision for loan losses that was recorded in 2015 compared to a $25.0 million loan loss reversal during 2014.

Net interest income for the third quarter was $315.2 million compared to $299.2 million in the same period last year. For the first nine months of 2015, net interest income was $939.8 million, compared to $919.5 million in the prior-year period. For both the quarter and year-to-date periods, the impact of higher average loan volume was partially offset by spread compression in the bank's loan and investment portfolios as well as a reduction in the amount of income from net accretion of asset and liability fair value adjustments resulting from our 2012 merger with U.S. AgBank.

Noninterest income was an important contributor to the bank's results for both the quarter and year-to-date periods. In the third quarter of 2015, noninterest income increased to $42.0 million, compared to $32.9 million in the same period last year. For the first nine months of the year, noninterest income was $138.9 million, compared to $89.9 million in the first nine months of 2014. The increases in noninterest income were driven by a rise in prepayment income, net of losses on early extinguishments of debt, related to a greater level of customer refinancing activity in the current period. In addition, the increase in noninterest income for the first nine months of 2015 included higher gains on sales of investment securities, partially offset by impairment losses on investment securities.

Overall loan quality measures for CoBank remain strong. At quarter-end, 1.69 percent of the bank's loans were classified as adverse assets, compared to 1.84 percent at December 31, 2014. Nonaccrual loans increased to $157.5 million at September 30, 2015 from $130.3 million at December 31, 2014. The bank's allowance for credit losses totaled $601.5 million at quarter-end, or 1.46 percent of non-guaranteed loans when loans to Farm Credit associations are excluded.

Capital levels remain well in excess of regulatory minimums. As of September 30, 2015, shareholders' equity totaled $7.8 billion, and the bank's permanent capital ratio was 15.6 percent, compared with the 7.0 percent minimum established by the Farm Credit Administration (FCA), the bank's independent regulator. At quarter-end, the bank held approximately $25.1 billion in cash and investments and had 188 days of liquidity, which was in excess of FCA liquidity requirements.

While we are pleased with our performance thus far this year, we face a number of challenging dynamics in our business as well as in the rural, domestic and global economies. The financial services industry continues to experience intense competition for customers, margin compression and a long period of low interest rates that pressure returns on invested capital and investment securities. Meanwhile, customers in many of the industries we serve are adjusting to a significantly lower commodity price environment, a stronger dollar, and political and regulatory uncertainty. Our board and management team continue to focus on building the long-term financial strength and capacity of the bank and on providing our customers the support they need to be successful. As always, we deeply appreciate the trust our customers place in us, and the opportunity to serve as their financial partner.

Everett Dobrinski
Chair of the Board

Management's Discussion and Analysis of Financial Condition and Results of Operations
CoBank, ACB

Business Overview

CoBank, ACB (CoBank or the Bank) is one of the four banks of the Farm Credit System (System) and provides loans, leases and other financial services to vital industries across the rural communities of America. The System is a federally chartered network of borrower-owned cooperative lending institutions and related service organizations. The System was established in 1916 by the U.S. Congress, and is a Government Sponsored Enterprise. CoBank is federally chartered under the Farm Credit Act of 1971, as amended (the Farm Credit Act), and is subject to supervision, examination, and safety and soundness regulation by an independent federal agency, the Farm Credit Administration (FCA).

Our customers consist of agricultural cooperatives; other food and agribusiness companies; rural energy, communications and water cooperatives and companies; rural community facilities; farmer-owned financial institutions including Agricultural Credit Associations and Federal Land Credit Associations (Associations); and other businesses that serve rural America. We provide a broad range of loans and other financial services through three operating segments: Agribusiness, Strategic Relationships and Rural Infrastructure.

The following discussion and analysis should be read in conjunction with the accompanying condensed consolidated quarterly financial statements and related notes and with our 2014 Annual Report to Shareholders.

Consolidated Results of Operations

Average loan volume was $81.6 billion during the first nine months of 2015 compared to $76.1 billion in the same period of 2014. The 7 percent increase in average loan volume primarily resulted from growth in lending to affiliated Associations in our Strategic Relationships operating segment, energy and communications customers in our Rural Infrastructure operating segment, and food and agribusiness companies in our Agribusiness operating segment.

Net income increased $11.5 million to $700.4 million for the nine months ended September 30, 2015, compared to $688.9 million during the same period in 2014. The increase in earnings primarily resulted from a higher level of prepayment income, net of losses on extinguishments of debt, higher net interest income and gains on the sale of investment securities. These factors were largely offset by a provision for loan losses, an increase in operating expenses and impairment losses on investment securities in the 2015 period.

Net interest income increased $20.3 million to $939.8 million for the nine months ended September 30, 2015, compared to $919.5 million for the same period in 2014. The increase in net interest income was primarily driven by higher average loan volume, partially offset by lower spreads in our lending and investment portfolios and a reduction in the amount of income from net accretion of asset and liability fair value adjustments resulting from the application of business combination accounting standards in connection with our 2012 merger with U.S. AgBank, FCB (AgBank). Net accretion for the nine months ended September 30, 2015 was $30.7 million compared to $39.2 million in the same period of 2014.

Net interest margin declined to 1.20 percent for the nine months ended September 30, 2015 from 1.24 percent for the same period in 2014. The reduction in our net interest margin included the impact of spread compression in our loan and investment portfolios as well as lower merger-related accretion and a higher level of cash balances held during the first nine months of 2015. These factors were somewhat offset by increased earnings from our invested capital.

We recorded a $10.0 million provision for loan losses in the first nine months of 2015. The 2015 provision for loan losses resulted from increased lending activity to food and agribusiness companies as well as a slight deterioration in credit quality impacting a small number of agricultural customers. In the first nine months of 2014 we recorded a $25.0 million loan loss reversal resulting primarily from a decline in the level of specific reserves needed for certain rural communications and energy loans as well as general improvement in the credit quality of our loan portfolio during that period. Notwithstanding the 2015 provision for loan losses, loan quality remains strong. Adversely classified loans and related accrued interest were 1.69 percent of total loans and related accrued interest at September 30, 2015 compared to 1.84 percent at December 31, 2014. Adversely classified loans at both September 30, 2015 and December 31, 2014 include a wholesale loan to one of our affiliated Associations, which is described in Note 11. The adverse classification of this wholesale loan did not impact our provision for loan losses or allowance for credit losses, as we do not anticipate any losses related to this wholesale loan. Excluding the impact of this Association loan, adversely classified loans and related accrued interest represented 0.72 percent of total loans and accrued interest as of September 30, 2015 compared to 0.73 percent as of December 31, 2014. Nonaccrual loans increased to $157.5 million at September 30, 2015 from $130.3 million at December 31, 2014 primarily due to the credit quality deterioration impacting a small number of agricultural customers and a communications customer, somewhat offset by the sale of an energy loan that had been in nonaccrual status. Loan charge-offs, net of recoveries, totaled $5.4 million in the first nine months of 2015 primarily related to an energy customer compared to net loan charge-offs of $1.5 million during the same period of 2014.

Noninterest income increased $49.0 million to $138.9 million for the nine months ended September 30, 2015 from $89.9 million for the same period in 2014. Noninterest income is primarily composed of fee income, loan prepayment income and miscellaneous gains and losses, offset by losses on early extinguishments of debt. The increase in noninterest income in 2015 was driven by a $32.8 million increase in prepayment income, net of losses on early extinguishments of debt, related to a greater level of customer refinancing activity in 2015 and a higher level of losses on debt extinguishments undertaken to position our balance sheet in the 2014 period. During the first nine months of 2015, we sold investment securities with a combined book value of $148.3 million for gains totaling $22.6 million. In the 2014 period, sales of investment securities resulted in gains totaling $4.2 million. Other noninterest income increased by $8.9 million in the nine months ended September 30, 2015, as compared to the same period in 2014, primarily due to an increased level of patronage income received from other System institutions. Net fee income totaled $79.7 million for the nine months ended September 30, 2015, relatively consistent with the same period in 2014. During the first nine months of 2015, we recorded impairments of $11.1 million on two credit-impaired investment securities due to lower projected cash flows resulting from loan modification activity in the underlying collateral. No impairment losses on investment securities were recorded during the nine months ended September 30, 2014. The sale and impairments of investment securities are discussed further beginning on page 11.

Total operating expenses for the nine months ended September 30, 2015 increased $17.9 million to $233.4 million from $215.5 million for the same period in 2014. Higher operating expenses included an increase in Farm Credit Insurance Fund (Insurance Fund) premium expense of $6.0 million. Insurance Fund premium rates are set by the Farm Credit System Insurance Corporation (Insurance Corporation) and were 13 basis points of adjusted insured debt obligations in the 2015 period compared to 12 basis points throughout 2014. The increase in Insurance Fund premium rates resulted from growth in overall System assets in 2014 and the Insurance Corporation’s projections for continued growth in 2015. Information services and purchased services expenses increased by a combined $5.9 million due to greater expenditures to enhance our service offerings, including further development of our cash management platform. General and administrative expenses increased $4.1 million and included greater levels of contributions to civic, charitable and other organizations that benefit the residents, communities and industries we serve in rural America. These contributions are consistent with our overall corporate social responsibility and the fulfillment of our mission. Occupancy and equipment expenses increased $2.4 million due to costs related to our new corporate headquarters in Greenwood Village, Colorado. Upon completion of the building, which we anticipate in the fourth quarter of 2015, a long-term lease, with CoBank as the lessee, will commence. Our employee compensation expense was $108.2 million for the first nine months of 2015, slightly lower than the $109.1 million in the same period of 2014 due to a lower level of accrued incentive compensation, somewhat offset by higher expense related to retirement plans. As of September 30, 2015, we had 879 employees.

Our income tax expense increased to $135.0 million for the nine months ended September 30, 2015, compared to $130.0 million for the same prior-year period primarily due to the increase in pre-tax earnings. Our effective tax rates were 16.2 percent and 15.9 percent for the nine months ended September 30, 2015 and 2014, respectively.

Notwithstanding the higher level of earnings in the first nine months of 2015, our annualized return on average common shareholders' equity decreased to 13.66 percent for the nine months ended September 30, 2015 from 14.67 percent for the same period in 2014. This decrease resulted from higher overall levels of common equity due to strong earnings over the past year and the reduction in net interest margin. Our annualized return on average assets decreased to 0.87 percent for the nine months ended September 30, 2015, compared to 0.91 percent for the same period in 2014 primarily due to the reduction in net interest margin, as previously discussed.

For the three months ended September 30, 2015, net income increased $11.1 million to $235.8 million compared to $224.7 million for the same prior-year period. The increase is primarily due to an increase in net interest income of $16.0 million as well as an $8.3 million increase in prepayment income, net of losses on early extinguishments of debt, driven by the factors discussed above. These items were partially offset by higher operating expenses and income tax expense in the third quarter of 2015.

Operating Segment Financial Review

We provide financial services to agricultural cooperatives; other food and agribusiness companies; farmer-owned financial institutions; rural energy, communications and water cooperatives and companies; rural community facilities; and other businesses that serve rural America. We conduct lending operations through three operating segments: Agribusiness, Strategic Relationships and Rural Infrastructure.

Loans outstanding and the allowance for loan losses by operating segment at September 30, 2015 and 2014 are reported in Notes 3 and 10 to the accompanying condensed consolidated financial statements. Net interest income on investment securities, which we hold primarily as a liquidity reserve, and gains and losses on investment securities are allocated to all operating segments, whereas the underlying investment securities are not allocated to the operating segments. Net income by operating segment is summarized in the following table and is more fully detailed in Note 10 to the accompanying condensed consolidated financial statements.

Net Income by Operating Segment ($ in Thousands)

For the Nine Months Ended September 30,	**2015**	**2014**
Operating Segment:		
Agribusiness	**$ 315,812**	$ 313,349
Strategic Relationships	**182,973**	179,967
Rural Infrastructure	**209,344**	200,415
Total Operating Segments	**708,129**	693,731
Corporate/Other	**(7,751)**	(4,834)
Total	**$ 700,378**	$ 688,897

Agribusiness

The Agribusiness operating segment includes loans and other financial services provided to a diverse market of cooperatives and other businesses in various agricultural sectors including grain handling and marketing, farm supply, fruits, nuts, vegetables, forest products, dairy, livestock, biofuels and food processing. Agribusiness loans outstanding totaled $24.4 billion at September 30, 2015 and December 31, 2014. The

Agribusiness segment includes our Agricultural Export Finance Division, which provides trade finance to support U.S. exporters of agricultural products. As of September 30, 2015, the Agricultural Export Finance Division had $4.8 billion in loans outstanding compared to $4.2 billion as of December 31, 2014. At September 30, 2015 and December 31, 2014, 41 percent and 44 percent, respectively, of the loans in the Agricultural Export Finance Division were guaranteed by the U.S. government. Our Agribusiness segment also includes Farm Credit Leasing Services Corporation (FCL), a wholly-owned subsidiary, which provides lease products and related services to Association partners, agribusinesses, agricultural producers and rural infrastructure companies. As of September 30, 2015 and December 31, 2014, FCL had $2.8 billion and $2.7 billion, respectively, in leases outstanding.

Agribusiness average loan volume increased 4 percent to $24.5 billion for the first nine months of 2015 from $23.6 billion for the same period of 2014. Growth in Agribusiness lending primarily stems from increased lending to food and agribusiness companies driven by new customer growth and increased lending in the protein sector. These increases were partially offset by lower levels of seasonal inventory financing at grain cooperatives driven by lower grain commodity prices.

Agribusiness net income increased $2.5 million in the first nine months of 2015 to $315.8 million from $313.3 million for the same period in 2014 due to a higher level of noninterest income. The impact of higher noninterest income was partially offset by an increase in operating expenses, a higher provision for loan losses and a lower level of net interest income.

Net interest income decreased by $8.3 million to $444.9 million for the nine months ended September 30, 2015 due to the impact of spread compression in our lending and investment portfolios, somewhat offset by higher average loan volume.

Agribusiness recorded a $10.2 million provision for loan losses during the first nine months of 2015 compared to a $2.0 million provision in the same prior-year period. The 2015 provision resulted from an increase in lending activity to food and agribusiness companies, increased leasing activity and slight deterioration in credit quality impacting a small number of agricultural customers. Nonaccrual loans increased to $85.0 million at September 30, 2015, as compared to $48.9 million at December 31, 2014, also primarily due to credit quality deterioration impacting a small number of agricultural customers. Loan charge-offs, net of recoveries, totaled $0.8 million for the nine months ended September 30, 2015, compared to loan recoveries, net of charge-offs, of $0.1 million for the nine months ended September 30, 2014.

Noninterest income increased $30.8 million to $96.8 million for the first nine months of 2015, as compared to $66.0 million in the same period of 2014 primarily due to the impact of gains recognized from the sale of investment securities, which are allocated to the operating segments, as well as an increased level of patronage income received from other System institutions. These items were partially offset by impairments recognized on investment securities, which are also allocated to the operating segments.

Agribusiness operating expenses increased to $137.8 million for the first nine months of 2015 from $128.3 million in the same period of 2014 due to the increase in Insurance Fund premiums and the increases in other operating expenses described on page 5.

Strategic Relationships

The Strategic Relationships operating segment includes loans from the direct funding relationships we have with our affiliated Association customer-owners and our funding relationships with other System institutions. Our affiliates include Associations operating in 23 states serving the Northwest, West, Southwest, Rocky Mountains, Mid-Plains, and Northeast regions of the United States. As of September 30, 2015, the Strategic Relationships portfolio totaled $41.5 billion, compared to $39.9 billion at December 31, 2014. The increase in outstanding loan volume resulted from higher seasonal demand in Association lending to agricultural producers and processors as well as new customer growth at the Associations. At September 30, 2015, loans outstanding included $37.4 billion in wholesale loans to our affiliated Associations and $4.1 billion of participations in wholesale loans made by other System banks to certain of their affiliated Associations, $3.7 billion of which are participations in wholesale loans made by the Farm Credit Bank of Texas.

Strategic Relationships average loan volume increased 6 percent to $39.9 billion for the nine-month period ended September 30, 2015, compared to $37.5 billion for the same prior-year period. The increase was primarily the result of growth in lending to certain affiliated Associations driven by their increased lending activities, as discussed above.

Strategic Relationships net income increased $3.0 million to $183.0 million for the first nine months of 2015, as compared to $180.0 million for the same prior-year period. The increase resulted from higher net interest income, somewhat offset by higher noninterest expense and an increase in operating expenses.

Net interest income increased by $9.6 million to $215.1 million for the first nine months of 2015 due to growth in average loan volume, partially offset by lower levels of merger-related accretion and spread compression in our investment portfolio.

As a wholesale lender to Associations, we benefit from the diversification of the Association loan portfolios and a strong collateral position. In addition, the earnings, capital and loan loss reserves of the Associations provide a buffer from losses in their respective loan portfolios. Lower spreads in the Strategic Relationships operating segment are commensurate with the lower risk profile and lower regulatory capital requirements. Notwithstanding the downgrade of an affiliated Association wholesale loan as discussed in Note 11, loan quality in Strategic Relationships is strong. No provisions for loan losses or allowance for credit losses have been recorded related to any of our Association wholesale loans.

Strategic Relationships recorded a net $4.1 million expense in noninterest income (expense) for the first nine months of 2015 compared to a net expense of $0.5 million for the same prior-year period primarily due to impairments recognized on investment securities in the current period, partially offset by gains on the sale of investment securities, both of which are allocated to the operating segments. Operating expenses increased to $28.1 million for the nine months ended September 30, 2015, compared to $25.0 million recorded in the 2014 period due to the impact of increased Insurance Fund premiums on investment securities and the increases in other operating expenses described on page 5.

Rural Infrastructure

The Rural Infrastructure operating segment includes loans and other financial services provided to cooperatives and other companies in the power and energy, communications and water and waste water industries as well as to community facilities vital to rural America. Customers include rural electric generation and transmission cooperatives, electric distribution cooperatives, renewable energy providers, independent power producers, investor-owned utilities, pipeline and local distribution companies, rural local exchange carriers, wireless providers, data transport networks, cable television systems, data centers, rural water and waste water companies, and rural health care and other community facilities. Significant investment in infrastructure is needed to support the businesses and communities of rural America. Fulfilling these needs requires the resources of both public and private investors and lenders. To that end, CoBank is committed to working with our Farm Credit System partners, commercial banks, government agencies and others to provide support for rural infrastructure financing needs to further the flow of capital into rural America. Rural Infrastructure loans outstanding totaled $18.6 billion at September 30, 2015, compared to $16.1 billion at December 31, 2014. Rural Infrastructure average loan volume increased 15 percent to $17.3 billion for the first nine months of 2015, compared to $15.0 billion for the same prior-year period. Growth in Rural Infrastructure loans outstanding and average loan volume resulted primarily from increased lending to electric distribution, communications and power supply customers.

Rural Infrastructure net income increased 4 percent to $209.3 million for the first nine months of 2015 from $200.4 million for the same period in 2014. The increase was primarily the result of higher noninterest income and an increase in net interest income. The increase was somewhat offset by the impact of a lower loan loss reversal and higher operating expenses during the current period.

Net interest income increased by $19.0 million to $286.1 million for the first nine months of 2015 as a result of the increase in average loan volume, somewhat offset by the decrease in lending and investment spreads.

Rural Infrastructure recorded loan loss reversals of $0.2 million and $27.0 million during the first nine months of 2015 and 2014, respectively. The 2015 reversal is due to a lower level of specific reserves, largely offset by the impact of growth in loan volume. The 2014 reversal primarily resulted from a lower level of specific reserves largely due to improved performance and favorable resolution of a small number of communications and energy loans, as well as overall improvement in credit quality within the segment. Nonaccrual loans in the Rural Infrastructure segment decreased to $72.5 million at September 30, 2015 from $81.4 million at December 31, 2014 due to the sale of an energy loan and payoff of a communications loan, somewhat offset by credit quality deterioration impacting a communications customer. Rural Infrastructure recorded loan charge-offs, net of recoveries, of $4.6 million for the nine months ended September 30, 2015, compared to $1.6 million for the same period of 2014. The 2015 charge-offs primarily related to an energy customer.

Noninterest income increased to $47.8 million for the first nine months of 2015 from $24.5 million for the same period in 2014 due to the impact of gains recognized from the sale of investment securities, which are allocated to the operating segments, higher prepayment income, net of losses on early extinguishments of debt, and a higher level of fee income.

Rural Infrastructure operating expenses increased to $67.2 million for the first nine months of 2015 compared to $62.7 million for the same prior-year period due to the increase in Insurance Fund premiums and the increases in other operating expenses described on page 5.

Credit Quality, Liquidity, Capital Resources and Other

Loan Quality

The following table presents loans and related accrued interest receivable, classified by management pursuant to our regulator's Uniform Loan Classification System, as a percent of total loans and related accrued interest.

Loan Quality Ratios

	September 30, 2015			December 31, 2014		
	Wholesale Loans [1]	Commercial Loans [2]	Total Bank	Wholesale Loans [1]	Commercial Loans [2]	Total Bank
Acceptable	**98.01 %**	**96.51 %**	**97.25 %**	97.76 %	96.62 %	97.20 %
Special Mention	**-**	**2.08**	**1.06**	-	1.92	0.96
Substandard	**1.99**	**1.39**	**1.68**	2.24	1.38	1.80
Doubtful	**-**	**0.02**	**0.01**	-	0.08	0.04
Loss	**-**	**-**	**-**	-	-	-
Total	**100.00 %**	**100.00 %**	**100.00 %**	100.00 %	100.00 %	100.00 %

[1] Represents loans in our Strategic Relationships operating segment

[2] Represents loans in our Agribusiness and Rural Infrastructure operating segments

Our overall loan quality measures remain strong at September 30, 2015. The level of adversely classified loans ("Substandard", "Doubtful" and "Loss") and related accrued interest as a percent of total loans and related accrued interest decreased from 1.84 percent at December 31, 2014 to 1.69 percent at September 30, 2015. The Substandard wholesale loans reflected in the table above relate to one affiliated Association loan which totaled $823.2 million and $891.3 million at September 30, 2015 and December 31, 2014, respectively. Pursuant to our regulatory requirements, we classify our wholesale loans using the same credit rating methodology as is used with our commercial loans. Our loans to affiliated Associations are collateralized by substantially all of the Association assets as well as the earnings, capital and loan loss reserves of the Associations which provide a buffer against losses in their retail loan portfolios. As a result of the collateralization and other mitigating factors described above, we do not anticipate any losses on that Association's wholesale loan, which is discussed further in Note 11. As of September 30, 2015, CoBank has not made any provision for loan loss or recorded any allowance for credit loss related to any of our wholesale loans.

We recorded a $10.0 million provision for loan losses in the first nine months of 2015 compared to a $25.0 million loan loss reversal during the 2014 period. The 2015 provision for loan losses resulted from increased lending activity to food and agribusiness companies as well as a slight deterioration in credit quality impacting a small number of agricultural customers. The 2014 reversal primarily resulted from a decline in the level of specific reserves needed for certain rural communications and energy loans as well as general improvement in the credit quality of our loan portfolio during that period. Total loan charge-offs, net of recoveries, were $5.4 million for the first nine months of 2015 compared to $1.5 million in the 2014 period. Nonaccrual loans increased to $157.5 million at September 30, 2015 from $130.3 million at December 31, 2014 primarily due to the credit quality deterioration impacting a small number of agricultural customers and a communications company, somewhat offset by the sale of an energy loan that had been in nonaccrual status. Our total allowance for credit losses (ACL), which includes the allowance for loan losses and the reserve for unfunded commitments, was $601.5 million at September 30, 2015 compared to $596.8 million at December 31, 2014. Our ACL as a percent of total loans was 0.71 percent at September 30, 2015 compared to 0.74 percent at December 31, 2014. ACL as a percent of non-guaranteed loans outstanding and excluding loans to Associations was 1.46 percent at September 30, 2015 compared to 1.54 percent at December 31, 2014.

While the overall credit quality of our loan portfolio remains strong and has been favorable in recent years, concentrations within our loan portfolio can cause the level of our loan quality, nonaccrual loans, charge-offs and provisions for loan losses or loan loss reversals to vary significantly from period to period. Agriculture is often impacted, both positively and negatively, by weather patterns, including the drought conditions currently affecting portions of the United States, particularly California. Prolonged drought conditions could result in reduced income and credit stress for producers and processors.

Liquidity and Investments

Our liquidity management objectives are to provide a reliable source of funding to borrowers, meet maturing debt obligations, provide additional liquidity if market conditions deteriorate, fund operations cost effectively and comply with regulatory requirements. While we believe that sufficient resources are available to meet liquidity management objectives through our debt maturity structure, holdings of liquid assets and access to the capital markets via the Federal Farm Credit Banks Funding Corporation, the volatility of our loan volume may cause our liquidity needs to vary significantly from day to day.

We monitor our liquidity position by assuming no ability to issue debt and calculating the number of days into the future we could meet maturing debt obligations by using available cash and eligible investments. System banks are required by regulation to maintain a minimum of 90 days of liquidity (cash and readily marketable investments generally discounted by 5 to 10 percent of market value) on a continuous basis and to establish an incremental liquidity reserve. At September 30, 2015, our liquidity was 188 days, compared to 172 days at December 31, 2014.

We hold cash and investment securities primarily to maintain a liquidity reserve and to manage short-term surplus funds. Our investment securities totaled $23.7 billion at September 30, 2015 compared to $24.3 billion at December 31, 2014.

The table below summarizes our investment securities and related unrealized gains (losses) by asset class.

Investment Securities ($ in Millions)

	September 30, 2015			December 31, 2014		
	Amortized Cost	Fair Value	Unrealized Gains (Losses)	Amortized Cost	Fair Value	Unrealized Gains (Losses)

Asset-Backed	33	45	12	71	96	25
Corporate Bonds	155	156	1	145	146	1
Total	$ 23,469	$ 23,720	$ 251	$ 24,205	$ 24,320	$ 115

Credit risk in our investment portfolio primarily exists in investment securities that are not explicitly or implicitly guaranteed by the U.S. government, which include our FHA/VA non-wrapped reperformer mortgage-backed securities (i.e. investment securities where residential mortgage loans serving as collateral were cured after a default), non-agency mortgage-backed securities (MBS), asset-backed securities (ABS) and corporate bonds. These securities collectively total $689.4 million (fair value) or 3 percent of our total investment securities as of September 30, 2015. Credit risk in our investment portfolio also arises from the inability of guarantors and third-party providers of other credit enhancements to meet their contractual obligations to us.

Pursuant to FCA regulations, non-agency MBS and ABS, which include our FHA/VA non-wrapped reperformer MBS, that are no longer rated triple-A by at least one major rating agency, corporate bonds that no longer carry one of the two highest ratings by at least one major rating agency or any investment whose market value is less than 80 percent of book value must be excluded from our liquidity reserve. As a result, as of September 30, 2015, $529.2 million of non-agency MBS and ABS securities were not included in our liquidity reserve. Another $153.0 million of investment securities, primarily representing Farmer Mac MBS, were not included in our liquidity reserve as of September 30, 2015, pursuant to regulation.

During the second quarter of 2015, we recorded impairment losses of $11.1 million on two FHA/VA non-wrapped reperformer MBS securities with an estimated total fair value of $54.5 million. These securities were originally acquired in connection with our merger with AgBank. These losses resulted from lower projected cash flows due to the impact of loan modification activity in the underlying collateral. One of these securities was subsequently sold during the third quarter of 2015 for total proceeds of $21.3 million, resulting in an $0.8 million gain. We recorded no impairment losses on investment securities during the first nine months of 2014. Increasing levels of defaults, foreclosures or modifications on residential mortgages, a decline in home prices or weak economic conditions may result in additional downward adjustments to the fair value of certain investment securities and the need to record future impairment losses against earnings.

During the nine months ended September 30, 2015, we also sold three non-agency ABS and one agency debt security with a combined book value of $127.8 million for total proceeds of $149.6 million. The three non-agency ABS securities had been previously impaired and were excluded from our liquidity reserve, and were sold due to favorable market conditions. For income tax purposes, the sale of these previously-impaired securities generated a capital loss carryforward. The sale of the agency debt security was consummated in order to generate capital gains and thereby utilize the substantial majority of this capital loss carryforward. In the 2014 period, we sold one ABS and two non-agency MBS with a combined book value of $23.1 million for total proceeds of $28.0 million.

As all of our investment securities are classified as "available for sale", we recognize changes in the fair value of our investment securities in accumulated other comprehensive income (loss), a component of shareholders' equity, unless losses are credit-related and considered other-than-temporary, in which case that portion of the loss is recorded in earnings. We recorded unrealized gains of $133.2 million for the first nine months of 2015, compared to $59.9 million for the same prior-year period. For the three months ended September 30, 2015 and 2014, we recorded unrealized gains of $92.2 million and unrealized losses of $53.2 million, respectively. The unrealized gains and losses recorded in these periods primarily reflect the impact of market interest rate changes on the fair value of fixed rate securities.

An additional source of liquidity is cash provided by our operating activities (primarily generated from net interest income in excess of operating expenses), which totaled $685.8 million and $643.8 million for the first nine months of 2015 and 2014, respectively.

The assets of the Insurance Fund would be used to repay maturing Federal Farm Credit Banks Consolidated Systemwide bonds, medium term notes and discount notes (collectively referred to as Systemwide Debt Securities), if no other sources existed to repay such debt. The Insurance Corporation has an agreement with the Federal Financing Bank, a federal instrumentality subject to the supervision and direction of the U.S. Treasury, pursuant to which the Federal Financing Bank would advance funds to the Insurance Corporation. Under its existing statutory authority, the Insurance Corporation may use these funds to provide assistance to the System banks in exigent market circumstances which threaten the banks' ability to pay maturing debt obligations. The agreement provides for advances of up to $10 billion and terminates on September 30, 2016 unless otherwise extended. The decision whether to seek funds from the Federal Financing Bank is in the discretion of the Insurance Corporation, and each funding obligation of the Federal Financing Bank is subject to various terms and conditions and, as a result, there can be no assurance that funding would be available if needed by the System.

Capital Resources

We believe that a sound capital position is critical to our long-term financial success and future growth. Our shareholders' equity is primarily composed of common and preferred stock and retained earnings, and totaled $7.8 billion at September 30, 2015, as compared to $7.4 billion at December 31, 2014.

At September 30, 2015, our permanent capital, total surplus, core surplus and net collateral ratios exceeded regulatory minimums, as depicted in the following table. The components of these ratios are described in our 2014 Annual Report.

Capital Ratios

	Regulatory Minimums	September 30, 2015	December 31, 2014
Permanent Capital Ratio	**7.00 %**	**15.57 %**	15.70 %
Total Surplus Ratio	**7.00**	**14.64**	14.81
Core Surplus Ratio (1)	**5.59**	**10.68**	10.47
Net Collateral Ratio (2)	**104.00**	**107.15**	107.22

(1) The regulatory minimum core surplus ratio is 3.5 percent, but the FCA requires the higher 5.59 percent during a period in which we include a portion of our common stock as core surplus.

(2) The regulatory minimum net collateral ratio is 103.0 percent, but the FCA requires the higher 104.0 percent during a period in which we have subordinated debt outstanding.

Pursuant to FCA guidance, a portion of our common stock is included in core surplus, subject to certain conditions. This inclusion will continue on a temporary basis until December 31, 2017 or the point at which the FCA will change its capital regulations in a manner that would be inconsistent with this treatment. The FCA requires that we also calculate our core surplus ratio excluding common stock and has established a 3.0 percent minimum for such ratio. As of September 30, 2015, our core surplus ratio excluding common stock was 9.14 percent.

We may from time to time seek to retire our outstanding debt or equity securities through calls, cash purchases and/or exchanges, in open market purchases, privately negotiated transactions or otherwise. We may also issue new debt or equity securities. Such calls, repurchases, exchanges or new issuances, if any, will depend on prevailing market conditions, the Bank's capital position and liquidity requirements, contractual restrictions, changes to capital regulations and other factors.

As described in our 2014 Annual Report, in 2013, the FCA announced its intent to revise sections of its capital regulations to conform more closely to the reform measures developed by the Basel Committee on Banking Supervision (the "Basel Committee") in "Basel III: A Global Regulatory Framework for More Resilient Banks and Banking Systems" ("Basel III"). On May 8, 2014, the FCA Board approved a proposed rule to modify the regulatory capital requirements for System banks, including CoBank, and Associations. The stated objectives of the proposed rule are as follows:

- To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as government-sponsored enterprises;
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System;
- To make System regulatory capital requirements more transparent; and
- To meet certain requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act").

As currently drafted, the proposed rule would, among other things, eliminate the core surplus and total surplus requirements and introduce common equity tier 1, tier 1 and total capital (tier 1 + tier 2) risk-based capital ratio requirements. The proposal would add a minimum tier 1 leverage ratio for all System institutions, which would replace the existing net collateral ratio for System banks. In addition, the proposal would establish a capital conservation buffer, modify and expand risk weightings and, for System banks only, require additional public disclosures. The revisions to the risk weightings of exposures would include alternatives to the use of credit ratings, as required by the Dodd-Frank Act.

The initial public comment period for the proposed capital rule ended on February 16, 2015. The FCA reopened the comment period from June 26, 2015 to July 10, 2015. While uncertainty exists as to the final form of the proposed rule, based on our preliminary assessment, we do not believe the new rule will impose any significant constraints on our business strategies or growth prospects.

Interest Rate Risk Management

Interest rate risk is primarily managed by adjusting the Bank's mix of interest-sensitive assets and liabilities through various strategies and through the utilization of interest rate risk management products, including interest rate swaps and other financial instruments (derivatives). We do not use derivatives for speculative or trading purposes. Derivatives are recorded at fair value as assets or liabilities on our consolidated balance sheets. Changes in the fair value of these derivatives are accounted for as gains or losses through current period earnings or as a component of accumulated other comprehensive income (loss), depending on the use of the derivatives and whether they qualify for hedge accounting treatment. Net changes in the fair value of derivatives and hedged items recorded in the consolidated statements of income totaled gains of $5.3 million and $4.3 million in the first nine months of 2015 and 2014, respectively. Changes in the fair value of derivatives recorded in other comprehensive income (loss) totaled losses of $5.8 million and $28.5 million in the first nine months of 2015 and 2014, respectively.

Business Outlook

Notwithstanding our strong financial performance in the first nine months of 2015, we continue to face market conditions that could make the lending and earnings environment less favorable for CoBank in the future. Growth in the U.S. economy remains modest. Growth in global markets has slowed and economic conditions are volatile, particularly given heightened geopolitical risks and weakening emerging markets. Interest rates remain low by historical standards and continue to negatively impact the returns on capital and investment securities. Monetary policy as established by the Federal Reserve and the policies of other central banks around the world create further uncertainty regarding interest rates and asset valuations. Competition across most of the industries we serve has intensified. Grain commodity prices have moved significantly lower than they have been in previous years and are subject to volatility driven by weather conditions and many other factors. Customers in many of the industries we serve are impacted by unpredictable commodity prices and agricultural yields, fluctuations in the value of the U.S. dollar, weather and ongoing political and regulatory uncertainty. Many of our energy customers are impacted by energy efficiency initiatives, price volatility of various fuel sources, emerging regulation of carbon dioxide emissions, increasing renewable energy standards and customer demand for distributed generation from solar energy. Rapidly changing technology and customer demands create uncertainty in the communications industry. These challenges could reduce the credit quality and/or influence the level of loan demand in certain sectors of our loan portfolio.

We continue to focus on delivering the credit and financial service products our customers need to thrive and grow, enhancing our enterprise risk management capabilities and maintaining our financial strength. We believe that our strong earnings, liquidity and capital will continue to provide the capacity to serve customers in all market conditions and to effectively lower the net cost of borrowing for our customers-owners through consistent and reliable patronage payments. We continue our disciplined approach to managing risk and will closely monitor asset quality. We also continue to maintain prudent discipline over expenses. Nevertheless, we will make investments in our people, processes, and technology to strengthen the value we provide to our customers, and to better fulfill our mission in rural America.

Under the guidance of our Board of Directors and through the focus of an experienced executive management team, we expect to achieve continued success through execution of our business strategies and by creating mutually beneficial partnerships with other System institutions, increasing market share, maintaining effective access to the agency debt capital markets, educating policy makers and other key stakeholders of the critical mission of CoBank and the Farm Credit System and optimizing current lending authorities. We continue to explore strategic alliances and other opportunities with other System institutions, financial service providers and other entities, including a branch of U.S. government under our public/private partnership initiative.

Forward-Looking Statements

Certain of the statements contained in this quarterly report that are not historical facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Our actual results may differ materially from those included in the forward-looking statements that relate to our plans, projections, expectations and intentions. Forward-looking statements are typically identified by words such as “believe,” “expect,” “anticipate,” “intend,” “estimate,” “plan,” “project,” “may,” “will,” “should,” “would,” “could” or similar expressions. Although we believe that the information expressed or implied in such forward-looking statements is reasonable, we can give no assurance that such projections and expectations will be realized or the extent to which a particular plan, projection or expectation may be realized. These forward-looking statements are based on current knowledge and are subject to various risks and uncertainties, including, but not limited to:

- Changes that negatively impact the agricultural, energy, communications and water industries;
- The level of interest rates and relationships between various interest rate indices and actions taken by the Federal Reserve to manage the monetary policy of the United States;

- Currency fluctuations that impact the value of the U.S. dollar in global markets;
- Weak U.S. economic conditions;
- Adverse food safety and weather events, disease, and other unfavorable conditions that periodically occur and impact agricultural productivity and income;
- Changes in levels of global crop production, exports, usage and inventories;
- Credit performance of the loan portfolio;
- Performance of underlying collateral, including farmland values;
- Loan portfolio growth and seasonal factors;
- Weaknesses in other developed and emerging economies;
- Government policies and political developments in the United States and other countries in which we do business;
- Geopolitical uncertainties that may impact the industries we lend to, or, economic, fiscal or monetary conditions;
- Changes in the U.S. government's support of the Farm Credit System, the agricultural industry, agricultural exports and rural economies;
- Legislative or regulatory actions that affect current and ongoing operations of the banking, financial services, agricultural, energy, communications and water industries;
- Legislative or regulatory actions that affect our relationships with our employees;
- Regulatory actions, including amendments to, and interpretations of, risk-based capital guidelines;
- Actions taken by the U.S. Congress relative to Government Sponsored Enterprises (GSEs), including the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Agricultural Mortgage Corporation (Farmer Mac);
- Actions taken by the U.S. government to manage U.S. fiscal policy, including tax reform;
- A decrease in the credit outlook or ratings of U.S. government debt and agency debt, including Systemwide Debt Securities;
- Cybersecurity risks, including a failure or breach of our operational or security systems or infrastructure, that could adversely affect our business, financial performance and reputation;
- Changes in assumptions underlying the valuations of financial instruments;
- Changes in the bases for our estimates underlying the allowance for credit losses;
- Failure of our investment portfolio to perform as expected or deterioration in the credit quality and expected cash flows of such investments;
- The resolution of legal proceedings and related matters;
- Environmental-related conditions or laws impacting our lending activities;
- Nonperformance by counterparties under our derivative contracts; and
- Our ability to continue to partner with various System entities in light of ongoing consolidation within the System and the industries we serve.

We expressly disclaim any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Notes to Condensed Consolidated Financial Statements

CoBank, ACB

(Unaudited) ($ in Thousands, Except Share and Per Share Amounts and as Noted)

Note 1 – Organization, Lending Authority and Significant Accounting Policies

The accompanying condensed consolidated financial statements include the accounts of CoBank, ACB and its wholly-owned subsidiaries, CoBank, FCB and Farm Credit Leasing Services Corporation (FCL), collectively hereinafter referred to as CoBank or the Bank. All material inter-company accounts and transactions have been eliminated. In our opinion, all adjustments considered necessary for a fair presentation of the interim financial condition, results of operations and cash flows have been made. These adjustments are of a normal recurring nature, unless otherwise disclosed. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted.

CoBank is a member of the Farm Credit System (System). We provide loans, leases and other financial services to agricultural cooperatives; other food and agribusiness companies; rural energy, communications and water cooperatives and companies; rural community facilities; farmer-owned financial institutions including Agricultural Credit Associations and Federal Land Credit Associations (Associations); and other businesses that serve rural America.

These unaudited quarterly condensed consolidated financial statements should be read in conjunction with the 2014 Annual Report, which includes a description of our organization and lending authority. Also included in the 2014 Annual Report is a summary of significant accounting policies. These quarterly condensed consolidated financial statements have been prepared in accordance with these same accounting policies. Certain reclassifications have been made to amounts reported in previous periods to conform to the 2015 presentation.

CoBank is the funding bank for certain System Associations, which are collectively referred to as our "affiliated Associations." The accompanying condensed consolidated financial statements exclude financial information of our affiliated Associations. CoBank and our affiliated Associations are collectively referred to as the "District." We separately publish certain unaudited combined financial information of the District, including a condensed statement of condition and statement of income, which can be found on our website at www.cobank.com. Such information is not incorporated by reference into, and should not be considered part of, this quarterly report. Additional information about our affiliated Associations and District financial information is contained in Note 11 to these condensed consolidated financial statements.

Copies of CoBank's financial reports are available on request by calling or visiting one of our banking center locations and through our website at www.cobank.com. Copies of financial reports of our affiliated Associations and the System are available on their respective websites.

We have evaluated subsequent events through November 6, 2015, which is the date the financial statements were issued.

Note 2 – Recently Issued or Adopted Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued guidance entitled "Revenue from Contracts with Customers." The guidance governs revenue recognition from contracts with customers and requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Financial instruments and other contractual rights within the scope of other guidance issued by the FASB are excluded from the scope of this new revenue recognition guidance. As such, a majority of our contracts would be excluded from the scope of this new guidance. For public business entities, the guidance becomes effective for the first interim reporting period within the annual reporting periods after December 15, 2016. For all other entities, the guidance is effective for annual reporting periods beginning after December 15, 2017, and interim periods within fiscal years beginning after December 15, 2018. We are in the process of reviewing the guidance to determine the effect, if any, on our consolidated financial position, results of operations or cash flows.

In April 2015, the FASB issued guidance entitled "Simplifying the Presentation of Debt Issuance Costs." The guidance requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt liability, consistent with the presentation of a debt discount. For public business entities, the standard is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. For all other entities, the standard is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within fiscal years beginning after December 15, 2016. We plan to adopt this standard on January 1, 2016 and anticipate the adoption of this guidance will have a minor impact on our balance sheet presentation, but will not impact our results of operations or overall financial condition.

Note 3 – Loans, Loan Quality and Allowance for Credit Losses

Loans Outstanding

Loans outstanding by operating segment are shown below.

($ in Millions)

	September 30, 2015	December 31, 2014
Agribusiness	**$ 24,384**	$ 24,359
Strategic Relationships	**41,492**	39,919
Rural Infrastructure	**18,649**	16,104
Total	**$ 84,525**	$ 80,382

Allowance for Credit Losses

The following tables present the changes in the components of our allowance for credit losses and details of ending balances. The allowance for credit losses includes the allowance for loan losses and the reserve for unfunded commitments. The elements of our allowance for credit losses are presented by operating segment.

	Agribusiness	Strategic Relationships[1]	Rural Infrastructure	Total
September 30, 2015				
Allowance for Loan Losses				
Beginning Balance at January 1, 2015	$ 329,633	$ -	$ 151,523	$ 481,156
Charge-offs	(2,565)	-	(5,596)	(8,161)
Recoveries	1,754	-	1,037	2,791
Provision for Loan Losses/(Loan Loss Reversal)	10,200	-	(200)	10,000
Transfers to Reserve for Unfunded Commitments[2]	(22,636)	-	(2,933)	(25,569)
Ending Balance at September 30, 2015	316,386	-	143,831	460,217
Reserve for Unfunded Commitments				
Beginning Balance at January 1, 2015	104,672	-	11,008	115,680
Transfers from Allowance for Loan Losses[2]	22,636	-	2,933	25,569
Ending Balance at September 30, 2015	127,308	-	13,941	141,249
Allowance for Credit Losses	$ 443,694	$ -	$ 157,772	$ 601,466
Allowance for Credit Losses				
Ending Balance, Allowance for Credit Losses Related to Loans:				
Individually Evaluated for Impairment	$ 18,800	$ -	$ 6,028	$ 24,828
Collectively Evaluated for Impairment	424,894	-	151,744	576,638
Total	$ 443,694	$ -	$ 157,772	$ 601,466
Loans				
Ending Balance for Loans and Related Accrued Interest:				
Individually Evaluated for Impairment	$ 84,981	$ 41,555,148	$ 72,505	$ 41,712,634
Collectively Evaluated for Impairment	24,360,098	-	18,655,906	43,016,004
Total	$ 24,445,079	$ 41,555,148	$ 18,728,411	$ 84,728,638

[1] As a result of a strong collateral position with respect to loans to Associations, along with the earnings, capital and loss reserves of Associations that serve as an additional layer of protection against losses, no allowance for credit losses is recorded in our Strategic Relationships operating segment.

[2] These transfers generally occur as a result of advances on or repayments of seasonal lines of credit or other loans.

	Agribusiness	Strategic Relationships[1]	Rural Infrastructure	Total
September 30, 2014				
Allowance for Loan Losses				
Beginning Balance at January 1, 2014	$ 284,967	$ -	$ 162,159	$ 447,126
Charge-offs	(1,481)	-	(2,118)	(3,599)
Recoveries	1,552	-	563	2,115
Provision for Loan Losses/(Loan Loss Reversal)	2,000	-	(27,000)	(25,000)
Transfers from Reserve for Unfunded Commitments[2]	(16,187)	-	2,742	(13,445)
Ending Balance at September 30, 2014	270,851	-	136,346	407,197
Reserve for Unfunded Commitments				
Beginning Balance at January 1, 2014	111,897	-	55,695	167,592
Transfers to Allowance for Loan Losses[2]	16,187	-	(2,742)	13,445
Ending Balance at September 30, 2014	128,084	-	52,953	181,037
Allowance for Credit Losses	$ 398,935	$ -	$ 189,299	$ 588,234
Allowance for Credit Losses				
Ending Balance, Allowance for Credit Losses Related to Loans:				
Individually Evaluated for Impairment	$ 11,700	$ -	$ 7,300	$ 19,000
Collectively Evaluated for Impairment	387,235	-	181,999	569,234
Total	$ 398,935	$ -	$ 189,299	$ 588,234
Loans				
Ending Balance for Loans and Related Accrued Interest:				
Individually Evaluated for Impairment	$ 41,572	$ 38,369,816	$ 70,092	$ 38,481,480
Collectively Evaluated for Impairment	21,805,804	-	15,588,219	37,394,023
Total	$ 21,847,376	$ 38,369,816	$ 15,658,311	$ 75,875,503

(1) As a result of a strong collateral position with respect to loans to Associations, along with the earnings, capital and loss reserves of Associations that serve as an additional layer of protection against losses, no allowance for credit losses is recorded in our Strategic Relationships operating segment.

(2) These transfers generally occur as a result of advances on or repayments of seasonal lines of credit or other loans.

The information in the tables under the Credit Quality, Aging Analysis and Impaired Loans captions is presented by operating segment, with guaranteed and non-guaranteed loans in our Agribusiness segment separately identified.

Credit Quality

The following table presents our loans and related accrued interest, classified by management pursuant to our regulator's Uniform Loan Classification System.

September 30, 2015	Agribusiness Non-Guaranteed	Agribusiness Guaranteed	Strategic Relationships	Rural Infrastructure	Total
Acceptable	**$ 21,320,053**	**$ 1,953,450**	**$ 40,731,994**	**$ 18,393,300**	**$ 82,398,797**

Interest Income Recognized	3,956	-	-	2,317	6,273

[1] There were no impaired loans in our Agribusiness Guaranteed or Strategic Relationships portfolios for any of the periods presented.

Commitments on Impaired Loans

There were $14.4 million in commitments available to be drawn by borrowers whose loans were classified as impaired at September 30, 2015.

Troubled Debt Restructurings

Troubled debt restructurings (TDRs) are loans in which we have granted a concession because the borrower is experiencing financial difficulty. Concessions may include payment deferrals, term extensions and/or interest rate reductions. As of September 30, 2015, all TDRs are classified as nonaccrual loans. TDRs classified as nonaccrual loans, along with other impaired loans, may be returned to accruing status upon meeting specific criteria, as more fully described in our 2014 Annual Report. During the nine months ended September 30, 2015 and 2014, respectively, there were no modifications that qualified as TDRs. Included in nonaccrual loans at September 30, 2015 and December 31, 2014 are $57.2 million and $61.9 million, respectively, of existing loans that qualify as TDRs.

Note 4 – Investment Securities

A summary of the amortized cost and fair value of investment securities available-for-sale is as follows:

($ in Millions)

September 30, 2015	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Fair Value	2,476	6,903	4,948	9,393	23,720

While the substantial majority of our residential MBS and asset-backed securities (ABS) have contractual maturities in excess of 10 years, expected maturities for these securities are shorter than contractual maturities because borrowers have the right to call or prepay obligations with or without penalties.

The following table shows the fair value and gross unrealized losses for investments in a loss position aggregated by investment category, and the length of time the securities have been in a continuous unrealized loss position at September 30, 2015 and December 31, 2014. The continuous loss position is based on the date the impairment first occurred.

	Less Than 12 Months		Greater Than 12 Months

We do not intend to sell the securities in unrealized loss positions, nor is it likely that we will be required to sell such securities, for regulatory, liquidity or other purposes, before an anticipated recovery of our cost basis occurs.

Credit Losses on Impaired Investment Securities

The following table details the activity related to the credit loss component of investment securities that have been written down for other-than-temporary impairment.

Credit Losses on Impaired Investments		($ in Millions)
Balance at December 31, 2014	$	57
Additional Credit Impairments Related to Securities Previously Impaired		10
Initial Credit Impairments Related to Securities Not Previously Impaired		1
Sales of Investments with Credit Impairments		(38)
Maturity of Investments with Credit Impairments		-
Subsequent Amortization (Accretion) for Increases in Cash Flows Expected to be Collected		(1)
Balance at September 30, 2015	**$**	**29**

During the third quarter of 2015, we enhanced our process for estimating the component of unrealized losses attributable to credit losses for these impaired investment securities. These enhancements primarily included using third-party credit and cash flow models which utilize loan level data to project future performance. These improvements did not materially impact the overall level of expected losses. Model projections are influenced by such factors as interest rates, economic conditions, including housing prices, and the performance, type and age of collateral. Projected prepayment rates ranged from 4 percent to 50 percent (conditional prepayment rate) for impaired investment securities at September 30, 2015. The model considers current and historical loan level performance information and the factors listed above to estimate future defaults. Default rates ranged from 3 percent to 25 percent for impaired investment securities at September 30, 2015. Loss severity results are derived using model estimated home price assumptions at the time of default and ranged from 12 percent to 88 percent for impaired investment securities at September 30, 2015.

Acquired Investment Securities

We hold certain credit-impaired investment securities acquired in our merger with U.S AgBank, FCB. The carrying amount of these investment securities was $451.4 million and $509.9 million at September 30, 2015 and December 31, 2014, respectively. These investments are subject to the provisions of Accounting Standards Codification (ASC) 310-30, Accounting for Certain Loans or Debt Securities Acquired in a Transfer, pursuant to which the difference between contractually required payments and the cash flows expected to be collected at acquisition is considered a non-accretable amount. This difference is neither accreted into income nor recorded on our consolidated balance sheets.

Quarterly, we evaluate estimated cash flows expected to be collected from acquired credit-impaired investment securities. Increases in expected cash flows will generally result in an increase in interest income over the remaining life of the investment. Decreases in expected cash flows due to credit deterioration will generally result in other-than-temporary impairment charges recognized against earnings. During the nine months ended September 30, 2015, we recorded $11.1 million in impairment losses related to two of our acquired credit-impaired FHA/VA non-wrapped reperformer MBS securities due to lower projected cash flows resulting from loan modification activity in the underlying collateral. One of these securities, which had a carrying amount of $20.5 million, was sold during the third quarter of 2015, resulting in an $0.8 million gain. No impairment losses on investment securities were recorded during the nine months ended September 30, 2014.

The excess of cash flows expected to be collected over fair value is referred to as “accretable amounts” and is recognized in interest income over the remaining life of the investment using the effective yield method, with the majority being recognized in diminishing amounts in the first five years following the merger.

Prior service cost/credit		(437)	Operating Expenses - Employee Compensation
Tax effect		678	Provision for Income Taxes
Total reclassifications	$	4,344	

Note 6 – Derivative Financial Instruments and Hedging Activities

Risk Management Objectives and Strategies

We maintain an overall interest rate risk management strategy that incorporates the use of derivative financial instruments to manage liquidity and to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Our goal is to manage interest rate sensitivity by modifying the repricing frequency or effective maturity of certain balance sheet assets and liabilities. We also maintain a foreign exchange risk management strategy to reduce the impact of currency fluctuations on our relatively nominal amount of foreign currency-denominated loans. As a result of interest rate and foreign exchange rate fluctuations, fixed-rate assets and liabilities will appreciate or depreciate in market value. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by gains and losses on the derivative instruments that are linked to these assets and liabilities. Interest rate and foreign exchange fluctuations also cause interest income and interest expense of variable-rate assets and liabilities to increase or decrease. The effect of this variability in earnings is expected to be substantially offset by gains and losses on the derivative instruments that are linked to these assets and liabilities.

Uses of Derivatives

To achieve risk management objectives and satisfy the financing needs of our borrowers, we execute various derivative transactions with other financial institutions. Derivatives (primarily interest rate swaps) are used to manage liquidity and the interest rate risk arising from maturity and repricing mismatches between assets and liabilities. Under interest rate swap arrangements, we agree with a counterparty to exchange, at specified intervals, payment streams calculated on a specified notional amount, with at least one payment stream based on a specified floating-rate index. We use a variety of interest rate swaps including the exchange of floating-rate for fixed-rate swaps and fixed-rate for floating-rate swaps with payment obligations tied to specific indices. In addition, we execute foreign exchange spot and forward contracts to manage currency risk on loans denominated in foreign currencies. We also enter into derivatives for our customers as a service to enable them to transfer, modify or reduce their interest rate risk and foreign exchange risk by transferring such risk to us. We substantially offset this risk transference by concurrently entering into offsetting agreements with counterparties.

The notional amounts of derivatives at September 30, 2015 and related activity for the first nine months of 2015 are shown in the following table.

Activity in the Notional Amounts of Derivative Financial Instruments

($ in Millions)	Swaps	Caps	Spots and Forwards	Total
December 31, 2014	$ 19,755	$ 2,961	$ 208	$ 22,924
Additions /Accretion	6,398	150	1,435	7,983

Terminations	(498)	-	-	(498)
September 30, 2015	$ 22,274	$ 2,913	$ 248	$ 25,435

The notional amounts of derivatives at September 30, 2014 and related activity for the first nine months of 2014 are shown in the following table.

Activity in the Notional Amounts of Derivative Financial Instruments

($ in Millions)	Swaps	Caps	Spots and Forwards	Total
December 31, 2013	$ 21,982	$ 2,684	$ 279	$ 24,945
Additions /Accretion	2,623	443	2,663	5,729
Maturities /Amortization	(4,381)	(164)	(2,732)	(7,277)
Terminations	(104)	-	-	(104)
September 30, 2014	$ 20,120	$ 2,963	$ 210	$ 23,293

Accounting for Derivative Instruments and Hedging Activities

We record derivatives as assets or liabilities at their fair value on the consolidated balance sheets. We record changes in the fair value of a derivative in current period earnings or accumulated other comprehensive income (loss), depending on the use of the derivative and whether it qualifies for hedge accounting. For fair-value hedge transactions that hedge changes in the fair value of assets or liabilities, changes in the fair value of the derivative will generally be offset in the statement of comprehensive income by changes in the hedged item's fair value attributable to the risk being hedged. For cash-flow hedge transactions, in which we hedge the variability of future cash flows related to a variable-rate asset or liability, changes in the fair value of the derivative are reported in accumulated other comprehensive income (loss). The gains and losses on the derivatives that we report in accumulated other comprehensive income (loss) will be reclassified as earnings in the period in which earnings are affected by the variability of the cash flows of the hedged item. We record the ineffective portion of all hedges in current period earnings.

For our customer transactions, which are not designated as hedging instruments, we record the related changes in fair value in current period earnings. We substantially offset this risk transference by concurrently entering into offsetting agreements with counterparties, with the changes in fair value of these transactions also recorded in current period earnings.

Fair Value Hedges

The majority of the fair value hedging activity relates to entering into interest rate swaps primarily to convert our non-prepayable fixed-rate debt to floating-rate debt to achieve our liquidity management strategy. The amount converted depends on contractual interest rates and maturities. For the remaining fair value hedges, we enter into receive-fixed, pay-floating swaps to align our equity positioning strategy with our risk management strategy. For fair value hedges, the amount of hedge ineffectiveness is recognized as net interest income in current period earnings.

Cash Flow Hedges

We purchase interest rate caps primarily to hedge cap risk embedded within a portion of our floating-rate investment securities. The interest rate caps hedge floating-rate debt cash flows that fund the cash flows from floating-rate investment securities. If the strike rates in the purchased interest rate caps are exceeded, we receive cash flows on the derivative to hedge our floating-rate funding exposure above such strike levels. We also enter into foreign exchange spot and forward contracts to manage currency risk on loans denominated in foreign currencies. Typically, foreign currency contracts are purchased to fund the principal cash flows of the loan and simultaneously sold to lock in the principal and interest cash flows upon repricing or maturity date of the loan. For cash flow hedges, the amount of hedge ineffectiveness, the amount excluded from effectiveness assessment, and the amounts reclassified from accumulated other comprehensive income (loss) into current period earnings are all reflected in net interest income. At September 30, 2015, we expect that $3.9 million of expense will be reclassified from other comprehensive income into earnings in the next 12 months, based on the anticipated cash flows of existing financial instruments. The maximum term over which we are hedging our exposure to the variability of future cash flows for all forecasted transactions is approximately 19 years.

Derivatives Not Designated as Hedges

Derivative agreements with our customers and the related offsetting derivative agreements with counterparties are not designated as hedging instruments and do not receive hedge accounting treatment. Accordingly, any changes in the fair value of these customer related derivatives are recognized immediately as noninterest income/expense in current period earnings.

Counterparty Credit Risk

The use of derivatives for risk management introduces credit risk related to customers and counterparties. Generally, when the fair value of a derivative contract is positive, we are exposed to credit risk.

Derivative transactions with our customers are typically secured through our loan agreements. As of September 30, 2015, the notional amount of derivatives with our customers totaled $5.9 billion.

Non-customer derivatives are transacted with derivative counterparties and governed by master swap agreements, which include bilateral collateral arrangements, requiring the Bank or our counterparties to post collateral on a daily basis with thresholds set at zero for all active counterparties. The master swap agreements also include netting agreements requiring the net settlement of covered contracts with the same counterparty in the event of default by the other party. The "net" mark-to-market exposure represents the netting of the positive and negative exposures with that counterparty. Notwithstanding these protections, we are exposed to intra-day credit risk with these counterparties. As of September 30, 2015, the notional amount of derivatives with our counterparties totaled $17.4 billion, which excludes the $2.1 billion of cleared derivatives discussed below.

We record derivative exposures and related cash collateral balances at gross amounts in our consolidated balance sheets. Pursuant to our master swap agreements, as of September 30, 2015, our counterparties had posted $164.0 million in cash and $43.8 million in securities as collateral with us. We estimate that the amount of losses related to derivatives we could be exposed to in the event of nonperformance by dealer counterparties to our derivative positions, net of collateral held by us, was $5.3 million at September 30, 2015.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") requires certain derivative transactions to be cleared through a central clearinghouse and traded on regulated exchanges. The U.S. Commodity Futures Trading Commission has exempted certain qualifying swaps entered into by financial cooperatives from these new requirements. The exemption does not cover all swaps executed by CoBank and is generally limited to swaps entered into in connection with loans to members. As a result, certain of our derivative transactions are cleared through a futures commission merchant (FCM) with a clearinghouse or central counterparty (CCP). When these swaps are cleared, a single bilateral swap is divided into two separate swaps with the CCP becoming the counterparty to both of the initial parties to the swap. CCPs have several layers of protection against default including initial and variation margin that is required to be posted by participants. FCMs prequalify counterparties to all cleared swaps, and also set limits for each counterparty and collect initial and variation margin daily for changes in the value of cleared derivatives. The margin collected from both parties to the swap protects against credit risk in the event a counterparty defaults. Initial and variation margin requirements are set by and held for the benefit of the CCP and additional initial margin may be required and held by the FCM. At September 30, 2015, the notional amount of our cleared derivatives was $2.1 billion. Initial and variation margin totaling $23.5 million and $52.7 million, respectively, was pledged for our cleared derivatives as of September 30, 2015.

In October 2015, the FCA and various other federal agencies jointly adopted final rules which will subject many non-cleared swaps to minimum initial and variation margin requirements. Such requirements become effective over the next two to five years. The group of federal agencies also issued an interim final rule excluding swaps that qualify for certain exemptions from the scope of the final margin rules. CoBank is eligible for certain regulatory exemptions related to, among other things, transactions with end users and with members of cooperatives. Accordingly, we do not currently anticipate that adoption of these rules will have a material impact on our use of derivatives or our overall financial position.

Hedge Terminations

During the nine months ended September 30, 2015, we terminated approximately $341.2 million in notional value of interest rate swaps for asset-liability management purposes. These swaps were accounted for as fair value hedges. We terminated interest rate swaps with customers and offsetting dealer counterparties totaling notional value of $156.7 million during the first nine months of 2015. Proceeds from the customer terminations were offset by payments for the offsetting dealer terminations.

A summary of the impact of derivative financial instruments on our condensed consolidated balance sheets as of September 30, 2015 and December 31, 2014 is shown in the following tables.

Fair Value of Derivative Financial Instruments

As of September 30, 2015	Fair Value of Derivative Assets[1]	Fair Value of Derivative Liabilities[2]
Derivatives Designated as Hedging Instruments		
Interest Rate Contracts	$ 239,745	$ -
Foreign Exchange Contracts	1,712	299
Total Derivatives Designated as Hedging Instruments	$ 241,457	$ 299
Derivatives Not Designated as Hedging Instruments		
Interest Rate Contracts	$ 201,577	$ 155,792
Foreign Exchange Contracts	2,193	2,433
Total Derivatives Not Designated as Hedging Instruments	$ 203,770	$ 158,225
Total Derivatives	$ 445,227	$ 158,524

[1] These assets make up the "Interest Rate Swaps and Other Financial Instruments" assets in the condensed consolidated balance sheet at September 30, 2015.

[2] These liabilities make up the "Interest Rate Swaps and Other Financial Instruments" liabilities in the condensed consolidated balance sheet at September 30, 2015.

Fair Value of Derivative Financial Instruments

As of December 31, 2014	Fair Value of Derivative Assets[1]	Fair Value of Derivative Liabilities[2]
Derivatives Designated as Hedging Instruments		
Interest Rate Contracts	$ 303,669	$ 3,538
Foreign Exchange Contracts	3,692	9
Total Derivatives Designated as Hedging Instruments	$ 307,361	$ 3,547
Derivatives Not Designated as Hedging Instruments		
Interest Rate Contracts	$ 146,589	$ 106,281
Foreign Exchange Contracts	1,706	1,792
Total Derivatives Not Designated as Hedging Instruments	$ 148,295	$ 108,073
Total Derivatives	$ 455,656	$ 111,620

Asset/Liability Offsetting

As noted previously, derivative transactions with swap dealers include bilateral collateral and netting agreements that require the net settlement of covered contracts. Derivative transactions with customers are collateralized through loan agreements. Notwithstanding collateral and netting provisions, our derivative assets and liabilities are not offset in the accompanying condensed consolidated balance sheets. The amount of collateral received or pledged is calculated on a net basis, by counterparty.

The following table summarizes derivative assets and liabilities, related accrued interest and amounts of collateral exchanged pursuant to our agreements.

Offsetting of Financial and Derivative Instruments

[1] Cash collateral received is recognized in the condensed consolidated balance sheets whereas investment securities received are not recognized in the condensed consolidated balance sheets as of September 30, 2015 and December 31, 2014, respectively.

Note 7 – Fair Value Measurements

The fair value of financial instruments represents the estimated amount to be received to sell an asset or paid to transfer or extinguish a liability (an exit price) in active markets among willing participants at the reporting date. The FASB has established a three-level fair value hierarchy aimed at maximizing the use of observable inputs – that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability.

A description of the methods, assumptions and inputs to the valuation process used to determine or estimate the fair value of each class of financial instruments within the three-level hierarchy follows.

Level 1

Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Our Level 1 assets at September 30, 2015 consist of assets held in a trust fund related to deferred compensation and nonqualified retirement plans. The trust fund includes investments in securities that are actively traded and have quoted net asset value prices that are directly observable in the marketplace.

Level 2

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. Our Level 2 assets and liabilities at September 30, 2015 include our derivative contracts, collateral balances related to derivative contracts, U.S. Treasury and agency debt investment securities, non-agency MBS, the substantial majority of agency MBS, and corporate bonds.

The fair value of our derivative financial instruments is the estimated amount to be received to sell a derivative asset or paid to transfer or extinguish a derivative liability in active markets among willing participants at the reporting date. Estimated fair value is determined through internal market valuation models. These models use an income approach and incorporate benchmark interest rate curves (primarily the USD LIBOR/swap curve), volatilities, counterparty credit quality and other inputs that are observable directly or indirectly in the marketplace. We compare internally calculated derivative valuations to broker/dealer quotes to substantiate the results. The fair value of collateral assets and liabilities related to derivative contracts is their face value, plus accrued interest, as these instruments are cash balances; therefore, fair value approximates face value.

The fair value of our investment securities classified as Level 2 is determined by a third-party pricing service that uses valuation models to estimate current market prices. Inputs and assumptions related to these models are typically observable in the marketplace. Such models incorporate prepayment assumptions and underlying collateral information to generate cash flows that are discounted using appropriate benchmark interest rate curves and volatilities. These third-party valuation models also incorporate information regarding non-binding broker/dealer quotes, available trade information, historical cash flows, credit ratings and other market information. Such valuations represent an estimated exit price, or price to be received by a seller in active markets to sell the investment securities to a willing participant. The estimated fair value of investment securities also appears in Note 4.

The following table presents information about valuation techniques and inputs to Level 2 fair value measurements.

Information About Valuation Techniques and Inputs to Level 2 Fair Value Measurements		
	Valuation Technique	**Inputs**
Investment Securities	Third-Party Pricing Service	Prepayment Rate
		Lifetime Default Rate
		Loss Severity
		Benchmark Yield Curve
		Quoted Prices
Interest Rate Swaps and Other Financial Instruments	Discounted Cash Flow	Benchmark Yield Curve
		Counterparty Credit Risk
		Volatility
Collateral Assets and Collateral Liabilities	Carrying Value	Par/Principal Plus Accrued Interest

Level 3

Level 3 inputs are unobservable and supported by limited or no market activity. Our Level 3 assets at September 30, 2015 include our Farmer Mac MBS, FHA/VA non-wrapped reperformer MBS, ABS and a small portion of agency MBS. Based on the lack of active trading volume and an orderly market for these securities, we classified these securities as Level 3. Fair value for all Farmer Mac MBS is calculated internally using third-party models. Fair value for FHA/VA non-wrapped reperformer MBS, Level 3 ABS and Level 3 agency MBS is estimated utilizing a third-party pricing service that uses valuation models to estimate current market prices. Inputs into all of these valuation models include underlying collateral data and projected losses as well as information for prepayment speeds and discounting spreads. Due to the lack of marketplace information, the inputs into these valuation models primarily represent management assumptions, with some corroboration to market inputs where information is available.

Level 3 assets at September 30, 2015 also include $50.1 million of loans originally measured at cost, which were written down to fair value as a result of impairment. The valuation of these assets requires a determination of the fair value of the underlying collateral, which may include the use of independent appraisals or other market-based information to develop a management estimate of fair value. As a result, these fair value measurements fall under Level 3 in the fair value hierarchy; however, they are excluded from the 'Assets and Liabilities Measured at Fair Value on a Recurring Basis' tables on pages 44 and 45 because they are not measured on a recurring basis.

Our Level 3 liabilities at September 30, 2015 include standby letters of credit whose market value is internally calculated based on information that is not observable either directly or indirectly in the marketplace.

No transfers into or out of the three levels of assets occurred during the nine months ended September 30, 2015 and 2014.

The following table presents quantitative information about Level 3 fair value measurements as of September 30, 2015.

Quantitative Information About Valuation Techniques and Unobservable Inputs to Level 3 Fair Value Measurements					
($ in Millions)		Fair Value	Valuation Technique	Unobservable Inputs	Range
Assets					
Investment Securities:

Estimated Fair Value of Certain Other Financial Instruments

The following table presents the estimated fair value of financial instruments that are recorded in the condensed consolidated balance sheets at cost, as well as certain off-balance sheet financial instruments, as of September 30, 2015 and December 31, 2014.

($ in Millions)

	September 30, 2015			December 31, 2014		
	Carrying Amount	Estimated Fair Value	Fair Value Hierarchy	Carrying Amount	Estimated Fair Value	Fair Value Hierarchy
Financial Assets:						
Net Loans	**$ 84,064**	**$ 85,404**	**Level 3**	$ 79,901	$ 81,416	Level 3
Financial Liabilities:						
Bonds and Notes	**$ 100,011** (1)	**$ 100,880** (1)	**Level 3**	$ 97,580 (2)	$ 98,367 (2)	Level 3
Subordinated Debt	**905**	**929**	**Level 3**	905	929	Level 3
Off-Balance Sheet Financial Instruments:						
Commitments to Extend Credit	**$ -**	**$ (110)**	**Level 3**	$ -	$ (114)	Level 3

(1) Includes $164 million in collateral liabilities carried at fair value as of September 30, 2015.

(2) Includes $239 million in collateral liabilities carried at fair value as of December 31, 2014.

Net Loans

Our loan portfolio includes fixed- and floating-rate loans. Since no active trading market exists for most of our loans, fair value is estimated by discounting the expected future cash flows using current interest rates at which similar loans would be made to borrowers with similar credit risk.

Bonds and Notes

Bonds and notes are not all traded in the secondary market and those that are traded may not have readily available quoted market prices. Therefore, the fair value of the instruments is estimated by calculating the discounted value of the expected future cash flows. The discount rates used are based on the sum of quoted market yields for the U.S. Treasury yield curve and an estimated yield-spread relationship between Farm Credit debt securities and U.S. Treasury securities. We estimate an appropriate yield-spread taking into consideration bank and security dealer yield indications, observed new government sponsored enterprise debt security pricing, and pricing levels in the related USD interest rate swap market.

Subordinated Debt

The fair value of subordinated debt is estimated based upon quotes obtained from a broker/dealer.

Commitments to Extend Credit

The fair value of commitments to extend credit is estimated by applying a risk-adjusted spread percentage to these obligations.

The following table presents information about valuation techniques and inputs to other fair value measurements.

Information About Valuation Techniques and Inputs to Other Fair Value Measurements

	Valuation Technique	Input
Net Loans	Discounted Cash Flow	Prepayment Rate
		Mark-to-Market Spread
		Benchmark Yield Curve
		Probability of Default
		Loss Given Default
Bonds and Notes	Discounted Cash Flow	Benchmark Yield Curve
		Farm Credit Spread
Subordinated Debt	Non-binding Broker/Dealer Quote	Price for Similar Security
Commitments to Extend Credit	Discounted Cash Flow	Mark-to-Market Spread

Note 8 – Employee Benefit Plans

We have employer-funded, qualified defined benefit pension plans, which are noncontributory and cover employees hired prior to January 1, 2007. We also have noncontributory, unfunded nonqualified supplemental executive retirement plans covering certain senior officers and specified other senior managers, as well as a noncontributory, unfunded nonqualified executive retirement plan designed to provide enhanced retirement benefits to two senior officers employed pursuant to employment agreements. We have a 401(k) retirement savings plan pursuant to which we match a certain percentage of employees' elective contributions. In addition, under this plan, employees hired on or after January 1, 2007 receive additional, non-elective employer defined contributions. For eligible senior managers, including our senior officers, we also have a nonqualified deferred compensation plan, which includes benefits not provided under the employee savings plan due to certain Internal Revenue Code limitations.

All retirement-eligible employees are also currently eligible for other postretirement benefits, which primarily include access to health care benefits. Substantially all participants pay the full premiums associated with these other postretirement health care benefits. Participant contributions are adjusted annually.

We contributed $2.7 million to our funded qualified defined benefit pension plans during the nine months ended September 30, 2015, and anticipate that we will contribute approximately $0.7 million more to such plans during the remainder of 2015. We expect to contribute a total of $0.5 million, net of collected retiree premiums, to our other postretirement benefit plans in 2015. We contributed $2.1 million to our trust funds related to our nonqualified retirement plans during the nine months ended September 30, 2015, and anticipate that we will contribute approximately $0.8 million more to such plans during the remainder of 2015. Our actual contributions could differ from the estimates noted above.

Note 9 – Commitments and Contingent Liabilities

Due to the often volatile seasonal borrowing requirements of our Agribusiness customers, which are impacted by changing commodity prices, farmer delivery patterns, weather and other factors, we provide a significant amount of revolving loan commitments. We also provide revolving loan commitments to other customers including those in the electric distribution and power supply industries. At September 30, 2015, commitments to extend credit and commercial letters of credit were $32.1 billion and $289.4 million, respectively.

Under the Farm Credit Act, we are primarily liable for the portion of outstanding Federal Farm Credit Banks Consolidated Systemwide bonds, medium term notes and discount notes (collectively referred to as Systemwide Debt Securities) issued by CoBank. Additionally, we are contingently liable for the outstanding Systemwide Debt Securities issued by the other System banks. Total Systemwide Debt Securities of the System were $231.3 billion at September 30, 2015.

There are several mechanisms in place affecting exposure to statutory joint and several liabilities. System banks are statutorily required to maintain eligible assets at a level at least equal in value to the total amount of debt for which such System bank is primarily liable. In addition, in the event of a default by a System bank, the Insurance Fund would be required to make timely payment of principal and interest on Systemwide Debt Securities, to the extent that net assets are available in the Insurance Fund, before the joint and several liability of the System banks would be triggered. At September 30, 2015, the aggregated assets of the Insurance Fund totaled $4.0 billion. Finally, System banks must maintain certain financial criteria in order to participate in Systemwide debt issuances. If these criteria are not met, a troubled System bank's access to and participation in Systemwide debt issuances could be limited or denied.

On at least a quarterly basis, we assess our liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. For those matters where it is probable that we will incur a loss and the amount of the loss can be reasonably estimated, we record a liability in our consolidated financial statements. For other matters, where a loss is not probable or the amount of the loss is not estimable, we will not accrue legal reserves. While the outcome of legal proceedings is inherently uncertain, based on information currently available, advice of legal counsel and available insurance coverage, we believe that our established legal reserves are adequate as of September 30, 2015 and the liabilities arising from our legal proceedings will not have a material adverse effect on the consolidated financial position, consolidated results of operations or consolidated cash flows of the Bank. However, in the event of unexpected future developments, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Bank's consolidated financial position, consolidated results of operations or consolidated cash flows.

Note 10 – Segment Financial Information

We conduct our lending operations through three operating segments: Agribusiness, Strategic Relationships and Rural Infrastructure.

The accompanying tables present condensed disaggregated information for the segments. Allocations of resources and corporate items, as well as measurement of financial performance, are made at these operating segment levels. We also allocate to our segments net interest income on investment securities as well as gains and losses on investment securities. Information to reconcile the total reportable segments to the total CoBank financial statements is shown as "other." Inter-segment transactions are insignificant.

We do not hold significant assets in any foreign country. Substantially all of our agricultural export finance loans are U.S. dollar-denominated and 41 percent of these loans are guaranteed by the U.S. government.

For the nine-month periods ended September 30, 2015 and 2014, no customer made up 10 percent or more of our gross or net interest income.

Note 11 – Affiliated Associations

CoBank is chartered by the FCA to serve the Associations that provide credit and related financial services to or for the benefit of eligible borrowers/shareholders for qualified purposes in specific geographic areas in the United States. The Associations are not authorized by the Farm Credit Act to participate in the issuance of Systemwide Debt Securities. Therefore, we are the primary funding source for our affiliated Associations. As of September 30, 2015, we have 26 affiliated Association customer-owners serving 23 states across the Northwest, West, Southwest, Rocky Mountains, Mid-Plains, and Northeast regions of the United States.

The Associations originate and service long-term real estate mortgage loans as well as short- and intermediate-term loans for agricultural purposes. The Associations may also purchase eligible loan participations from System entities and other lending institutions. Additionally, the Associations serve as an intermediary in offering multi-peril crop insurance and credit life insurance, and providing additional financial services to borrowers.

The Farm Credit Act and FCA regulations require us to exercise supervision over certain operating activities of our affiliated Associations. CoBank and our affiliated Associations operate under a creditor/debtor relationship evidenced by a General Financing Agreement (GFA) entered into separately with each Association. The GFA sets forth the creditor/debtor relationship between us and each Association and also references certain requirements contained in the Farm Credit Act and FCA regulations. The Associations' respective boards of directors are expected to establish and monitor the necessary policies and procedures to comply with all FCA regulations. In all other respects, the lending relationship with the Associations is substantially similar to that with our other borrowers.

Our affiliated Associations are considered customers and thus operate independently and maintain an arms-length relationship with us, except to the extent that the Farm Credit Act requires us, as the funding bank, to monitor and approve certain activities of these Associations. Accordingly, the financial information of affiliated Associations is not included in our condensed consolidated financial statements.

Effective January 1, 2015, Frontier Farm Credit (Frontier), one of our affiliated Associations, and Farm Credit Services of America (FCSAmerica), an Association affiliated with AgriBank, FCB, formed a strategic alliance. As part of the alliance, Frontier and FCSAmerica have integrated their day-to-day business operations, systems and leadership teams while continuing to exist as separate Associations. Each Association will continue to have its own board, with representatives participating in a coordinating committee to facilitate board governance between the two organizations. CoBank will continue as the funding bank for Frontier.

In December 2014, the boards of directors of two affiliated Associations, Farm Credit Services of East Central Oklahoma, ACA, and Chisholm Trail Farm Credit, ACA, signed a letter of intent to merge with an anticipated completion date of January 1, 2016. The boards and stockholders of both Associations have approved the merger, and the FCA has granted preliminary approval.

In 2014, one of our affiliated Associations, Farm Credit Services Southwest, ACA (FCSSW), noted a sudden significant increase in delinquencies in a discrete portion of its retail lending portfolio. An in-depth investigation directed by a special investigative committee of the FCSSW board of directors identified material weaknesses in internal controls relating to credit origination, administration, servicing and cash management procedures. As a result, it was determined that certain loans were made to ineligible borrowers under the Farm Credit Act and/or were inadequately secured. In October 2014, the board of directors and management of FCSSW announced that FCSSW's financial statements as of and for the year ended December 31, 2013, and the prior years included therein, as well as the three months ended March 31, 2014 and the six months ended June 30, 2014 could no longer be relied upon. In July 2015, FCSSW published restated financial reports for the above-mentioned periods.

As a result of these events, our wholesale loan to FCSSW, which totaled $823.2 million at September 30, 2015, was downgraded to the ‘Substandard’ credit quality classification. Pursuant to our regulatory requirements, we classify our wholesale loans using the same credit rating methodology as is used with our commercial loans. Our loans to affiliated Associations are collateralized by substantially all of the Association assets, and the earnings, capital and loan loss reserves of the Associations provide us a buffer against losses in their retail loan portfolios. While the ‘Substandard’ classification resulted from events during 2014 described above, we did not incur any losses on FCSSW’s wholesale loan. Effective November 1, 2015, FCSSW became a wholly-owned subsidiary of Farm Credit West, ACA, another of our affiliated Associations. The wholesale loan to Farm Credit West, ACA, which now includes the amounts previously associated with FCSSW, is rated in the ‘Acceptable’ credit quality classification.

Controls and Procedures

CoBank, ACB

We maintain a system of disclosure controls and procedures. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information disclosed by us in our quarterly and annual reports is accumulated and communicated to our management, including our chief executive officer and our chief financial officer, as appropriate, to allow timely decisions to be made regarding disclosure. The chief executive officer and the chief financial officer have evaluated our disclosure controls and procedures as of the end of the period covered by this quarterly report and have concluded that our disclosure controls and procedures are effective as of that date.

We also maintain a system of internal controls. The term "internal controls," as defined by the American Institute of Certified Public Accountants' Codification of Statement on Auditing Standards, AU-C Section 315, means a process - effected by the board of directors, management and other personnel - designed to provide reasonable assurance regarding the achievement of objectives in reliability of financial reporting, the effectiveness and efficiency of operations and compliance with applicable laws and regulations. We continually assess the adequacy of our internal control over financial reporting and enhance our controls in response to internal control assessments and internal and external audit and regulatory recommendations. There have been no significant changes in our internal controls or in other factors that could significantly affect such controls subsequent to the date we carried out our evaluations. In accordance with our internal control procedures, these financial statements were prepared under the oversight of the Audit Committee of our Board of Directors.

Certification Required by Farm Credit Administration Regulations

The undersigned have reviewed this quarterly report which has been prepared in accordance with all applicable statutory or regulatory requirements and certify that the information contained herein is true, accurate, and complete to the best of our knowledge and belief.

Signed this 6th day of November, 2015.

CERTIFICATION

I, Robert B. Engel, Chief Executive Officer of CoBank, ACB (CoBank or the Bank), a federally chartered instrumentality under the Farm Credit Act of 1971, as amended, certify that:

(1) I have reviewed this quarterly report of CoBank;

(2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

(3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, and cash flows of CoBank as of, and for, the periods presented in this report;

(4) CoBank's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting for CoBank and have:

   a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Bank, including its consolidated subsidiary, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. evaluated the effectiveness of the Bank's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. disclosed in this report any change in the Bank's internal control over financial reporting that occurred during the Bank's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Bank's internal control over financial reporting; and

(5) CoBank's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Bank's auditors and the audit committee of the Bank's board of directors (or persons performing the equivalent functions):

   a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Bank's ability to record, process, summarize, and report financial information; and
   b. any fraud, whether or not material, that involves management or other employees who have a significant role in the Bank's internal control over financial reporting.
